- **More about the Workshop:**

Since the selected PhraCons in the first Workshop are in German, this first workshop will involve only members with sufficient proficiency in German. During the first workshop, we will present and discuss the proposed classifications and, if applicable, any new criteria suggested by WG1 members. The aim is to assess the relevance of the proposed criteria—developed by Anna Pavlova, Carmen Mellado, and Roberta Rada—and to work collaboratively on an empirically grounded classification of PhraCons in German.
